Personal Statement

Tech enthusiast with a strong interest in rapidly evolving technologies and AI-assisted development. A quick learner who adapts easily to new tech stacks and tools, consistently delivering high-quality results both independently and in collaborative environments.

Skills

Programming: JavaScript (ES6), TypeScript and GO

Stacks: Next JS, Angular JS, React, Node Js, Express, Open AI and Tailwind CSS

Tools: Mongo DB, PostgreSQL, Supabase, Firebase Amazon DynamoDB, Docker, GIT, JIRA, Github and Figma

Languages: English(Conversational), Dutch(Basic), Sinhala(Conversational) and Tamil(Native)

Professional Experience

Intern - Seller Tower

11/2024 - 05/2025

- As a Full Stack Developer, I developed user interfaces using Next.js, along with Ant Design and Bootstrap for styling. On the backend, I worked with Go to build and manage services, while utilizing Amazon DynamoDB as the database.

Stacks- Next JS, Tailwind CSS, Go, Ant Design, Amazon DynamoDB, GIT and Docker

Intern - Elmali Tech

11/2025 - 12/2025

- Used Antigravity AI for building and iterating features, prompt-driven architecture planning and context-aware coding while building frontend.
- Optimized development speed while maintaining clean project structure and built and integrated AI features into an E-commerce website..

Stacks- Next JS, React JS, Tailwind CSS, Node JS, Open AI, PostgreSQL and GIT

Education

Cardiff Metropolitan University (ICBT Colombo)

03/2022 - 03/2024

Higher Diploma in Computing and Software Engineering

Personal Projects

CV Analyzer

An e-commerce platform where users can browse and order products, add items to their wishlist, and share reviews, including admin panel features.

Stacks: Next Js, Node Js, Mongo DB and Ant Design
