Personal Statement

Full-stack developer who builds and ships scalable web applications quickly, with hands-on experience in Next.js, Go, and cloud infrastructure. Proven ability to deliver production-ready features through Agile collaboration and AI-assisted development workflows.

Skills

Programming	:	JavaScript, TypeScript, Go
Frontend	:	Next.js, React, Angular, Tailwind CSS, Ant Design, ShadCN, HTML, CSS
Backend & Databases:		Node.js, Express.js, REST API Development, PostgreSQL, MongoDB, MySQL, Amazon DynamoDB
Cloud & DevOps:		AWS (S3, DynamoDB), Docker
AI Integration & Data :		LLMs (Gemini, Llama), Vector Databases (SQLite, Qdrant)
		Git, Jira, Figma
Tools & Workflow	:	
Languages:		English(Conversational), Dutch(Basic), Sinhala(Conversational) and Tamil(Native)

Professional Experience

Intern - Seller Tower 11/2024 - 05/2025

- Built and integrated **full-stack features** using Next.js (frontend) and Go (backend)
- Developed responsive UI with Tailwind CSS and Ant Design
- Worked with **Amazon DynamoDB** for scalable data management
- Collaborated in an **Agile team**, participating in code reviews and sprint cycles
- Assisted with deployment and infrastructure using Docker, AWS (S3), and Terraform

Stacks- Next JS, Tailwind CSS, Go, Amazon Dynamo DB, GIT and Docker

Intern - Elmal Tech 11/2025 - 12/2025

- Redesigned and developed **frontend interfaces** for pre-release products using Next.js and React
- Built responsive UIs with Tailwind CSS and ShadCN, using Redux for state management
- Applied **prompt engineering techniques** to accelerate development using tools like Claude and Antigravity AI
- Leveraged AI-assisted workflows to rapidly prototype features while maintaining clean and scalable code
- Integrated frontend components with backend APIs in a staging environment

Stacks- Next JS, React JS, Tailwind CSS, Node JS, PostgreSQL, Antigravity, Claude code and GIT

Education

Cardiff Metropolitan University (ICBT Colombo)

03/2022 - 03/2024

Higher Diploma in Computing and Software Engineering

Personal Projects

Snaphunt

- Built a full-stack application using **Next.js and Node.js** to automate CV screening and candidate ranking.
- Designed and implemented a **RAG-based architecture** using LLMs (Llama) and vector storage (SQLite) for context-aware evaluation.
- Implemented a **two-stage filtering pipeline** (keyword filtering + job description matching) to improve candidate relevance.
- Integrated LLM APIs with custom API key handling to generate **CV scoring and reasoning outputs**.
